

YATIN JAIN

Software Engineer | Full-Stack & Backend Developer

Jaipur, Rajasthan, India | +91 7357910535 | jainyatin693@gmail.com | linkedin.com/in/yatinjain75 | github.com/yatinjain75

PROFESSIONAL SUMMARY

“Seeking an entry-level opportunity in software engineering to apply my academic foundation in computer science, strengthen my expertise in full-stack development, and contribute to innovative projects. Eager to learn modern technologies and grow as a software developer while delivering quality solutions.”

TECHNICAL SKILLS

Languages: Python, C, C++, JavaScript, SQL (PostgreSQL, MySQL), HTML5, CSS3

Frameworks & Libraries: Django, Django REST Framework (DRF), Next.js, React, Tailwind CSS, Framer Motion, Streamlit, Pandas

Databases & Cloud Tools: PostgreSQL, MongoDB, MySQL, Supabase, Git, GitHub, Postman, Vercel, Railway

Core CS & Architecture: RESTful APIs, JWT Authentication, RBAC, Data Structures & Algorithms, DBMS, OOP, Operating Systems

WORK EXPERIENCE

Goldenhat Technologies

June 2026 – Present

Software Engineer Intern

Remote

- Developing and maintaining responsive web applications and scalable backend services using Next.js, React, and Python.
- Architecting secure RESTful API endpoints, optimizing PostgreSQL queries, and reducing server response latency.
- Implementing robust client and server-side state synchronization, elevating user workflow efficiency.
- Collaborating in agile team sprints, engaging in peer code reviews, and writing maintainable, modular code.

Navodita Infotech

July 2025 – August 2025

Python Developer Intern

Remote

- Engineered automated Python data processing scripts, increasing dataset processing throughput by 25%.
- Implemented backend application workflows, integrated third-party RESTful APIs, and conducted unit testing.

SkillCraft Technology

February 2025

Data Science Intern

Remote

- Analyzed multi-dimensional datasets with Python, Pandas, and Scikit-learn to identify high-impact statistical patterns.

FEATURED PROJECTS

Baba Ratna Plant Zone – Agricultural ERP & Client Portal

June 2026

Next.js, React, Supabase, PostgreSQL, Tailwind CSS

Production Deployed

- Architected an enterprise Agricultural ERP system with Role-Based Access Control (RBAC) across Admin, Expert, and Staff roles.
- Built an automated user provisioning module using Next.js Server Actions and Supabase Admin API with secure PIN credentials.
- Developed server-validated API routes protecting sensitive administrative workflows and mitigating authorization vulnerabilities.
- Designed a mobile-first dashboard with Tailwind CSS and Framer Motion with fluid animations and responsive modals.

Library & Seat Management System

February 2026

Python, Streamlit, MongoDB, Werkzeug

Cloud Deployed

- Constructed a full-stack library platform automating inventory tracking, book issuance, and real-time floor seat reservations.
- Programmed an interactive Admin console with live seat occupancy analytics, fine calculation, and support ticket triage.
- Secured sensitive user credentials via Werkzeug cryptographic password hashing and deployed on Streamlit Cloud.

Learning Tracker (Backend Microservice)

July 2025

Django REST Framework (DRF), JWT, Postman

API Service

- Architected a RESTful backend API service for goal management, daily progress tracking, and milestone evaluations.
- Implemented JSON Web Token (JWT) user authorization and authored comprehensive Postman API collections with automated tests.

EDUCATION

Jaipur Engineering College and Research Centre (JECRC)

Expected 2026

Bachelor of Technology (B.Tech.) in Computer Science and Engineering | CGPA: 6.82

Jaipur, India

CERTIFICATIONS

MongoDB Python Developer Path (MongoDB Inc.) | Python Crash Course (Campus Code) | Music Recommendation Systems Masterclass (Physics Wallah)
